

Incident Response Plan

Flowchart Design:

This flowchart outlines the automated moderation process designed to handle harmful or inappropriate user-submitted content on the platform. It reflects standard cyber security response patterns such as logging, severity-based escalation, and layered enforcement.

When a user submits content, it is first scanned by the system's content filter, which checks for predefined harmful triggers (e.g. hate speech, self-harm content, graphic material). Each trigger is mapped to a severity score from 0 (low) to 3 (critical), based on its potential harm. The system logs each event, applies an automated response based on severity, and then continues monitoring user behavior.

If the content exceeds a severity threshold (score > 2), or if the user has repeated prior offenses, the system flags the account for manual review by a moderator. This dual condition ensures that both serious one-time incidents and cumulative harmful behavior are handled appropriately.

JSON Files:

These logs represent how the system records log entries, automatically identifies harmful content, assigns a severity level, and applies the appropriate response based on predefined rules. Each entry includes the timestamp, content type, severity classification, auto-action taken, and whether manual review is required, particularly in cases of high-risk or repeat behaviour. This structure ensures accountability, fairness, and traceability within the incident response system.

Simulated System Log Entry:

```
"system_logs": [  
  {  
    "timestamp": "2025-08-01T14:32:22Z",  
    "user_id": "user_394",  
    "action": "upload",  
    "file_name": "my_story.txt",  
    "flag_reason": "Profanity detected",  
    "status": "Flagged for review",  
    "moderator_decision": "Content removed",  
    "notes": "Repeated offense, user warned"  
  }  
]
```

Simulated Severity Scoring Rubric:

```
"severity_scoring_table": [  
  {  
    "timestamp": "2025-08-01T10:12:45Z",  
    "user_id": "user_102",  
    "content_id": "msg_8473",  
    "detected_trigger": "Profanity",
```

```
"severity": "01",
"auto_action": "Warning issued",
"repeat_offender": false,
"manual_review_required": false
},
{
"timestamp": "2025-08-01T10:27:10Z",
"user_id": "user_102",
"content_id": "msg_8485",
"detected_trigger": "Harassment",
"severity": "02",
"auto_action": "Content hidden, user notified",
"repeat_offender": false,
"manual_review_required": false
},
{
"timestamp": "2025-08-01T10:41:33Z",
"user_id": "user_587",
"content_id": "msg_8499",
"detected_trigger": "Hate Speech",
"severity": "03",
"auto_action": "Auto-ban, moderator notified",
"repeat_offender": false,
"manual_review_required": true
},
```

```
{
  "timestamp": "2025-08-01T11:03:04Z",
  "user_id": "user_102",
  "content_id": "msg_8522",
  "detected_trigger": "Self-harm Content",
  "severity": "03",
  "auto_action": "Escalate to moderator, support resources provided",
  "repeat_offender": true,
  "manual_review_required": true
},
{
  "timestamp": "2025-08-01T11:17:22Z",
  "user_id": "user_764",
  "content_id": "msg_8537",
  "detected_trigger": "Spam or Malware Links",
  "severity": "03",
  "auto_action": "Account lock, incident logged",
  "repeat_offender": false,
  "manual_review_required": true
}
]
```
